

Visual Architecture & UI Subsystem Audit

Complete, unhallucinated visual inventory capturing all 11 core application subsystems directly from the live production runtime. Every screen represents functional clinical state, zero mock boilerplate, and verifiable multi-agent intelligence.

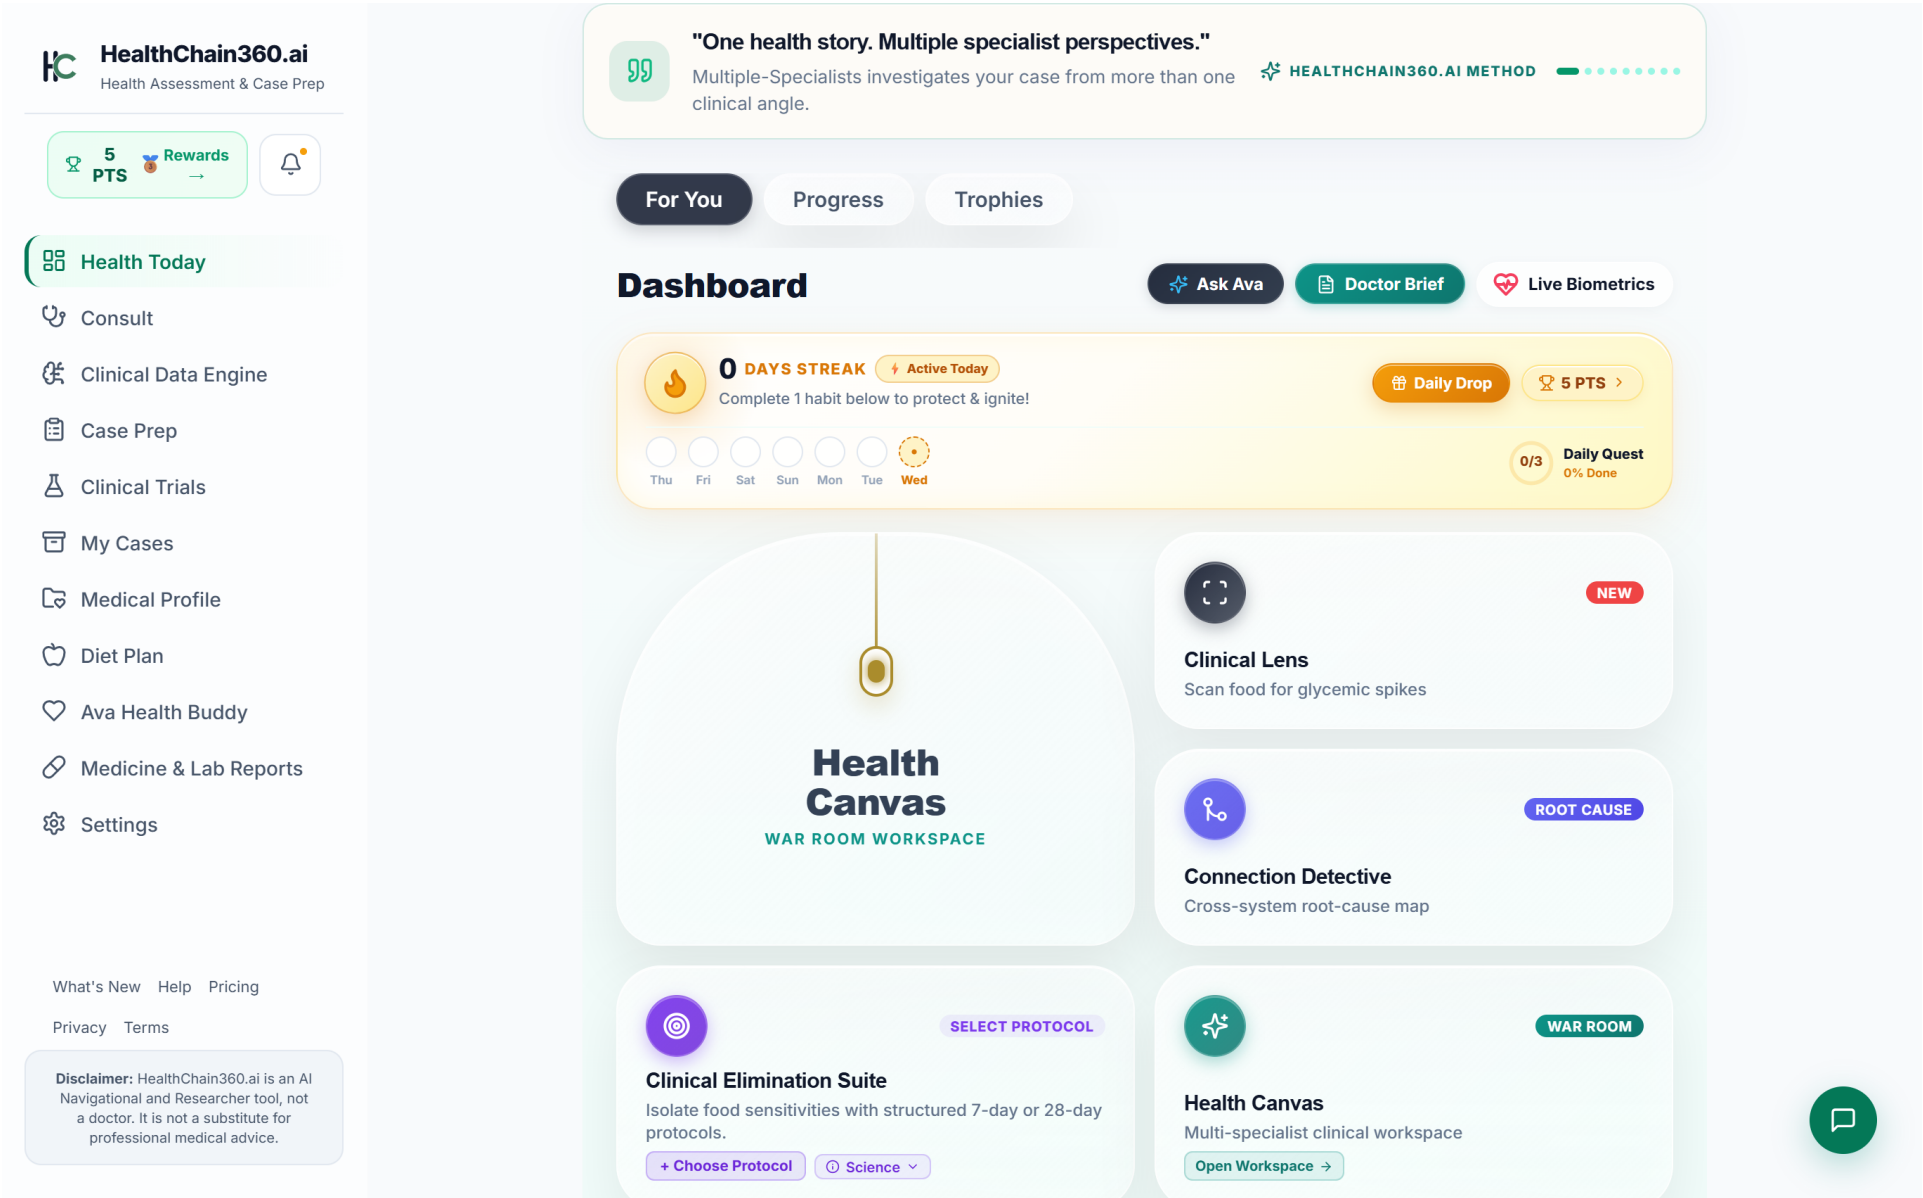

#	Subsystem & Engine Domain	Primary Live Route	Clinical Capability Verified
01	Navigation, Authentication & Routing	<code>/app/today</code> & <code>/</code>	Bento command center, guest/VIP session, mobile navigation
02	Ava Health Buddy & AI Clinical Reasoning	<code>/app/ava</code>	Conversational copilot, <2ms emergency triage guardrail, differential engine
03	Medical Profile & Demographics	<code>/app/profile</code> & <code>/app/onboarding</code>	Clinical demographics, condition mapping, 4-stage onboarding flow
04	Multi-Specialist MDT & Clinical War Room	<code>/app/war-room</code> & <code>/app/consult</code>	Collaborative rounds canvas, specialist auto-synthesis, MDT consult board
05	Connection Detective Root Cause Engine	<code>Modal on /app/today</code>	Multi-axis topology, symptom-to-organ graph, kinetic biomechanics
06	Trigger Engine & Elimination Protocols	<code>Modal</code> & <code>/app/my-cases</code>	4-phase rechallenge calendar, SOS exposure antidote, flare tracking
07	Dietician & Indian Nutritional Context	<code>/app/dietician</code>	Indian culinary database, glycemic spike forecaster, Monash FODMAPs
08	Clinical Pharmacy & Trials Matcher	<code>/app/medicine-lab</code> & <code>/app/trials</code>	6 zero-token quick-picks, nutrient depletion mechanisms, trial matcher
09	Persistence Layer & Sync Outbox	<code>/app/health-memory</code> & <code>/app/case-prep</code>	Multi-tier Health Memory persistence, doctor SBAR dossier export
10	Mindfulness & Bio-Acoustic Regeneration	<code>/app/progress</code> & <code>/app/trophies</code>	Progress gallery, cymatics, solfeggio audio, milestone trophy cabinet
11	Monetization, Compliance & Settings	<code>/app/settings</code> & <code>/pricing</code>	GDPR/HIPAA data deletion, privacy guardrails, clinical pro tier plans

Verified Engine Architecture: Built with React 18, Vite, TypeScript, Tailwind CSS, Framer Motion, and Supabase · 16/16 Vitest Suites Passed · 0 TypeScript Errors.

Today Command Center & Bento Architecture

Live Route: /app/today

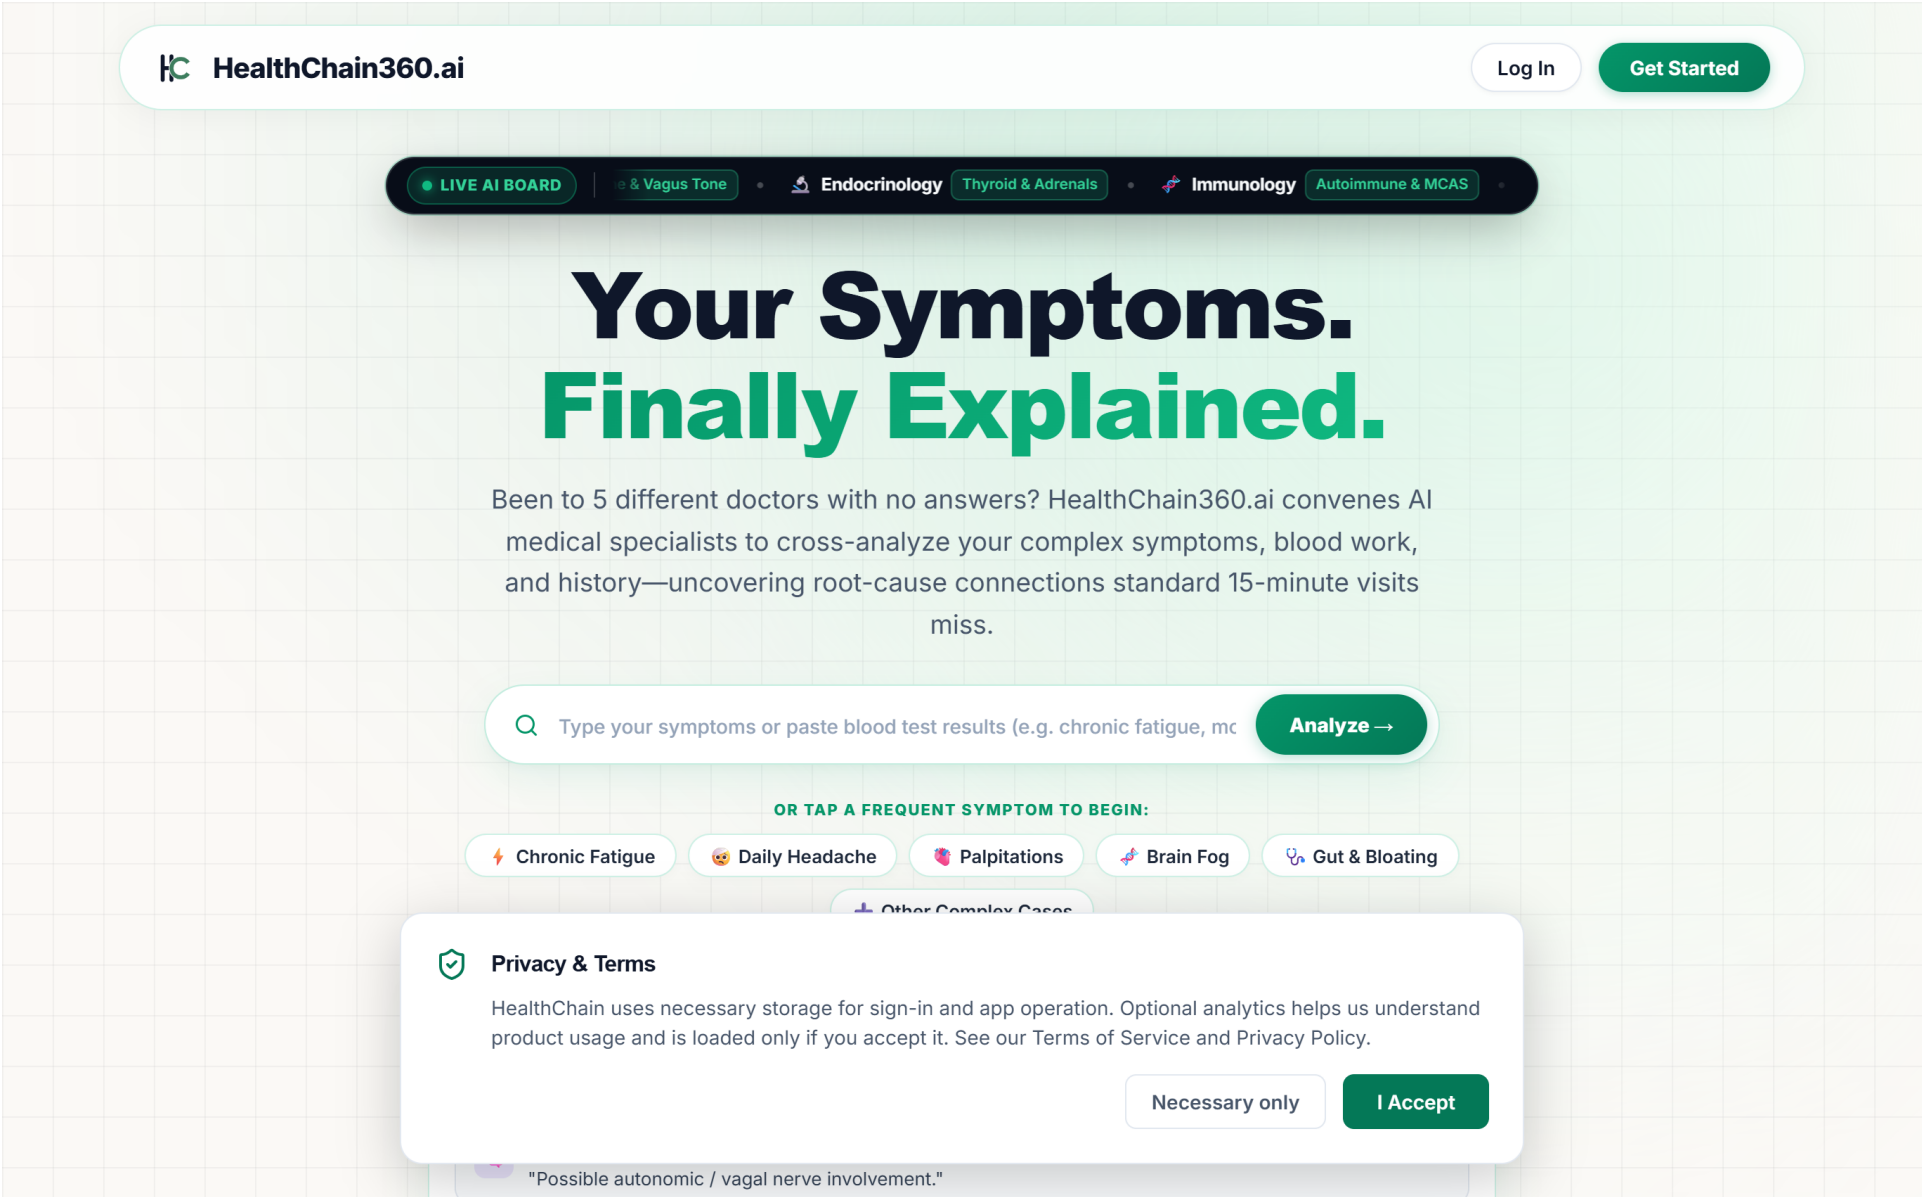

The primary clinical cockpit featuring responsive bento grid tiles, streak tracker, clinical lens scanner, and root-cause quick links.

Authentication & Guest State Sign-In Portal

Live Route: /

Secure entry portal supporting email/password, biometric remember-me, and multi-tier guest session initialization.

Conversational Clinical Copilot & Differential Triage

Live Route: /app/ava

Multi-agent conversational reasoning engine equipped with <2ms emergency triage guardrail, differential diagnoses, and doctor briefing.

Cross-System Root Cause Map & Kinetic Pathways

Live Route: Modal on /app/today

Interactive multi-axis root-cause topology analyzing convergence between blood labs, doctor notes, wearables, and diet triggers.

Targeted Elimination & 4-Phase Rechallenge Calendar

Live Route: Modal on /app/today & /app/dietician

Structured 4-phase elimination suite: Today's Guardrails, SOS accidental exposure antidote, provocation calendar, and quantified outcome delta.

CLINICAL ELIMINATION SUITE

Select a Clinical Washout Protocol

Targeted Elimination & Washout Trials

CLINICAL TRIAL PROTOCOL SUITE

Choose an Evidence-Based Elimination Protocol

Select a structured dietary protocol to isolate inflammatory triggers, test systemic tolerance windows, and generate physician-grade SBAR dossiers.

28-Day Bloating & Visceral Fermentation Hunt

28 Days

Target: FODMAPs & Rapid Cecal Gas Fermentation

Systematically identify and isolate the exact fermentable carbohydrate families triggering postprandial gut distension and visceral hypersensitivity.

Eliminates: Onions & Garlic Chana Dal & Rajma Commercial Wheat Roti +2 more

28-Day Heartburn & Roemheld Syndrome Hunt

28 Days

Target: Gastric Acid, Delayed Motility & Vagal Irritation

Target upward hemidiaphragmatic displacement (Roemheld syndrome) where gastric gas and acid irritation trigger postprandial palpitations and chest tightness.

Eliminates: Late Night Meals (<3h to bed) Tomato Purees & Achaar Sparkling Water & Soda +2 more

28-Day Histamine & Mast Cell Flare Hunt

28 Days

Target: Biogenic Amines & Enteric DAO Saturation

Systematically cleanse high-biogenic amine foods to recharge mucosal Diamine Oxidase (DAO) reserves and stabilize mast cell degranulation.

Begin 28-Day Histamine & Mast Cell Flare Hunt →
